Map of Passaic County Transit Service, Passaic County Food Pantries/Charities, Passaic County CSAs and Farmers' Markets, Passaic County, NJ Fast Food Restaurants with Population/Car Ownership Classification (Population Density, % Car Ownership, Distance from Food Outlets in Miles), as of 2011.

Population/Car Ownership Classification, as of 2011.

TRF categorized all block groups in the continental US into categories using Census data for population density and car ownership rates. This process resulted in 12 categories ranging from: Density 1 (lowest density - high car ownership) to Density 7 (highest density - lowest car ownership). Areas designated as "Insufficient Data" were not included in the study. Please see the Data Directory for our methodology, for the family of LSA indicators, and for the exclusion criteria.

Map of Custom Region (Passaic County Municipalities) and Passaic with Full Service Supermarkets (2011), Limited Service Stores (2011), Passaic County Bus Service, Passaic County CSAs and Farmers' Markets, Passaic County, NJ Fast Food Restaurants and Estimated percent of workers who drove to work in 2005-2009.

Estimated percent of workers who drove to work in 2005-2009.

Estimated percent of workers age 16 years or older who did not work at home who commuted to work by motor vehicle in 2005-2009. The number of workers commuting by motor vehicle include those driving a car, truck or van alone and those taking car or van pool services to work. Percentage calculations were suppressed in cases where the denominator of the calculation was less than 10 of the unit that is being described (eg, households, people, householders, etc). Such areas are represented as having "Insufficient Data" in the map. Denominators for Percentage calculations were created by summing all of the component data items in a particular dataset.

Map of Passaic with Full Service Supermarkets (2011), Limited Service Stores (2011), Passaic County Bus Service, Passaic County CSAs and Farmers' Markets, Passaic County, NJ Fast Food Restaurants and Distance to closest public transit rail stop in miles, as of 2009.

Distance to closest public transit rail stop in miles, as of 2009.

Distance to closest public transit rail stop in miles, as of 2009. Distance was calculated from the center point of the Census Tract. Public transit rail stops are taken from the Urban Mapping inventory of rail stops, as of March 2009. For more information about the geographic coverage of Urban Mapping data, see the Data Directory. Grey areas of the map are labeled as having Insufficient Data if they are more than fifteen miles from a rail stop, possibly indicating no coverage for a given area.

Map of Passaic with Brownfields, Passaic County CSAs and Farmers' Markets and Limited Supermarket Access (LSA) status, as of 2011.

Limited Supermarket Access (LSA) status, as of 2011.

All block groups included in the Limited Supermarket Access Study are designated as either "LSA" (within a Limited Supermarket Access) or "Not LSA" (not within a Limited Supermarket Access) according to TRF's analysis. TRF's methodology is designed to identify areas where residents travel longer distances to reach supermarkets when compared to the benchmark (average) distance traveled by residents of non-low/moderate income areas. Comparative areas are grouped based on similar values for population density and car ownership rates. The data sources include US Census (2010) for population living in households, residential land area, US Census ACS data (2005-2009) for car ownership rates; and Trade Dimensions (2011) data for supermarket locations. Areas designated as "Insufficient Data" were not included in the study. Please see the Data Directory for our methodology, for the family of LSA indicators, and for the exclusion criteria.
